Design and Construction of Concrete Floors

George Garber
Design and Construction of Concrete Floors
Design and Construction of Concrete Floors

George Garber
# Contents

## Introduction

1. Thinking about floor design
   - The floor’s dual role
   - A user-oriented approach
   - Beyond structural design
   - A balanced approach
   - Method versus performance specifications
   - Single-course floors
   - Standards
   - Lessons from roadbuilding
   - Remedies for bad work

## Part I The uses of concrete floors

2. Non-industrial floors
   - Residential floors
   - Office floors
   - Floors for the retail trade
   - Institutional floors

3. Warehouse floors
   - Storage systems
   - Materials-handling systems
   - Battery-charging areas
   - The load-class system

16 Crack control in ground-supported floors 253
   The “let it crack” approach 254
   Unreinforced floors with joints 254
   Reinforced floors without joints 257
   Reinforced floors with joints 262
   Prestress 267
   Sub-slab friction 274

Part V The floor surface 275

17 Floor finishing 277
   Principles of finishing 277
   Tools for finishing 278
   The order of finishing steps 290
   Types of finishes 291
   Other finishing methods 294
   How to specify finishes 297

18 Concrete toppings 299
   Monolithic toppings 299
   Bonded toppings 301
   Unbonded toppings 302
   Forbidden thicknesses 303
   Cement–sand screeds 303
   Terrazzo 309
   Summary – choosing a topping 310

19 Surface regularity 311
   Flatness and levelness 312
   Defined versus random traffic 312
   F-numbers 313
   The TR 34 system 320
   Straightedge tolerances 325
   Factors that affect surface regularity 326
   Superflat floors 329

20 Resistance to wear 333
   The traditional approach 334
   Classifying wear resistance 335
   Testing wear resistance 337
   How to specify wear resistance 340
   Factors that affect wear resistance 340
   Improving wear resistance 345
21 Resistance to chemical attack 349
Concrete's chemical resistance 349
Protecting the concrete 350
Attack from below 353

22 Preparation for coatings, toppings and floorcoverings 355
Moisture 355
Bond 361
Surface regularity 362
